

LAB 2 — AGILE BACKLOG CREATION & SPRINT SIMULATION

Deliverable 1: EPICs

Project: Hyperlocal Courier Dispatch & Tracking (HCDT)

The Jira workspace was organized into four major functional Epics. The associated User Stories, priorities, and Story Points are shown below.

Epic 1: Courier Request & Order Management

Enables the sender to create and manage courier delivery requests, including pickup and destination details and initiating a delivery request.

Jira ID	User Story	Priority	Story Points
HCDT-6	Create Courier Request	High	5

Epic 2: Rider Dispatch & Assignment

Enables the system to identify suitable active delivery riders and assign courier requests based on rider availability and proximity to the pickup location.

Jira ID	User Story	Priority	Story Points
HCDT-7	Match Courier Request with Nearest Rider	High	5

Epic 3: Route Optimization & Delivery Tracking

Enables optimized routing for deliveries involving multiple stops and provides delivery status and GPS tracking information to the sender.

Jira ID	User Story	Priority	Story Points
HCDT-8	Update Delivery Status	Medium	3
HCDT-9	Optimize Multi-Stop Delivery Route	Medium	8

Epic 4: OTP Verification & Delivery Completion

Enables secure destination verification using an OTP and allows the delivery to be confirmed and completed after successful verification.

Jira ID	User Story	Priority	Story Points
HCDT-10	Verify Delivery Using OTP	High	5

Total Story Points: 26

Sprint 1 contained HCDT-6, HCDT-7 and HCDT-8 for a planned 13 Story Points. HCDT-9 and HCDT-10 remained in the backlog.
